

What is the Hospital Safety Grade?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital’s overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety (https://www.hospitalsafetygrade.org/media/file/JournalofPatientSafety_HospitalSafetyScore.pdf)

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.
